Playissm

Master Positioning

The strategic source of truth for the brand, its ecosystem and its direction.

WHERE PLAY SPARKS POSSIBILITY

SEPTEMBER 2026

Playissm

What is *PLAYISSM*?

PLAYISSM designs human-centred learning environments and sensory-informed spaces that combine neuroscience, design and play to improve learning, wellbeing and human experience.

WHY WE EXIST

People don't experience learning, play, sensation and emotion in separate boxes. They experience them together, so we design them together.

WHAT WE BELIEVE

How people feel in an environment shapes how they engage with it. Design for rhythm, sensory experience, choice, connection and regulation, and you create better conditions for curiosity and learning.

WHAT WE DO

We build physical environments, learning ecosystems, programmes and experiences that put the philosophy into practice, from childhood and education to public and everyday spaces.

POSITIONING

PLAYISSM sits where play, learning, sensory experience and human-centred design meet, creating environments and experiences that help people engage, regulate, explore and connect.

Playissm

Five threads. *One* experience.

01

Play

Opens up possibility, curiosity, experimentation and joy.

02

Learning

Goes deeper when people can choose, take part and connect ideas to experience.

03

Sensory experience

Shapes how we perceive and respond to the world around us.

04

Regulation

Sets our readiness: attention, participation and the ability to engage.

05

Human connection

Gives experience its meaning and creates belonging.

We don’t design a single product, programme or space. We design *the conditions around the experience.*

Playissm

ISSM, *the way we play.*

I

Immersive

People experience, rather than simply receive.

S

Self-Directed

Choice, agency and individual pace matter.

S

Synergetic

Elements work together, not in isolation.

M

Mindful

Attention goes to the person, the environment and the moment.

THREE GUIDING ROOTS

Rhythms · Modes · Invitations

How we think about pace, states of engagement, and how a space invites participation without forcing it.

THE LIVING LOOP

Rhythm
How people arrive

Mode
How they engage

Invitation
What is offered

New rhythm
The loop continues

Playissm

One philosophy. *Three verticals.*

Playissm

The umbrella. The philosophy, methodology and ecosystem that connect the work.

SENSORY ENVIRONMENTS

PlaySense

Sensory and regulation-led environments for public and shared spaces, including airports, hospitality and other high-use settings.

LEARNING ECOSYSTEM

Kagami 鏡

A global, rhythm-led, regulation-first studio school and learning ecosystem.

PHYSICAL EXPERIENCE

PlayStudio

Physical spaces where play, learning, creativity, community and everyday life come together.

Each vertical expresses the same belief: how people learn, play, regulate, move and connect can be designed with intent.

Playissm

The space *between* disciplines.

We draw on child development, education, play, sensory experience, environmental design and wellbeing, without being defined by any one of them.

WE ARE

- Human-centred
- Multidisciplinary
- Experience-led
- Thoughtful
- Contemporary
- Inclusive

Playful without being childish. Sophisticated without being clinical.

WE ARE NOT

- ~~A traditional school~~
- ~~A therapy clinic~~
- ~~A conventional playground company~~
- ~~An interior design studio~~
- ~~A generic wellness brand~~
- ~~A one-size-fits-all activity provider~~

WHO WE WORK WITH

Families · children and parents

Learning · schools, educators, institutions

Built environments · airports, hospitality, real estate, designers, architects, developers

Communities · organisations and public spaces

06 THE DIRECTION

A world where the way people feel, move, learn and connect is designed as *intentionally* as the spaces around them.

NEAR TERM

Establish the ecosystem and prove the philosophy through real projects, learning experiences and physical environments.

LONGER TERM

Build a recognisable body of methodology, IP, spaces, programmes and partnerships that travel across geographies and contexts.

THE AMBITION

Make human experience, including regulation, curiosity, agency and connection, a meaningful part of how environments and learning are designed.

Playissm

IMMERSIVE. INCLUSIVE. MINDFUL.
