PlaySense

Sensory environments for public and shared spaces.

WHAT IT IS

PlaySense brings the PLAYISSM approach into physical environments: sensory, regulation-led spaces where people can navigate, pause, recover and reconnect with their surroundings.

WHAT IT DOES

We design sensory environments, quiet spaces and regulation-led experiences for airports, hospitality, workplaces and other shared settings. We shape the whole experience: spatial planning, sensory cues, movement, sound, light, touch, pace, transitions and the needs of different users.

THE PLAYISSM DIFFERENCE

More than a sensory room or a set of equipment. PlaySense treats the environment itself as part of the experience: purposeful, dignified and intuitive, and open to being used in different ways by different people.

LONG-TERM DIRECTION

A recognisable approach to sensory and regulation-led design that adapts across contexts, cultures and scales, from dedicated rooms to features built into everyday public spaces.

WHO IT'S FOR

Airports and transport · Hospitality · Public spaces · Real estate · Workplaces · Institutions · Communities · Organisations seeking inclusive environments
