PlayStudio

A physical ecosystem for play, learning, creativity and community.

WHAT IT IS

The physical expression of PLAYISSM: a multidisciplinary space where play, learning, making, reading, movement, creativity and community sit side by side.

WHAT IT DOES

Activity spaces, creative studios, a reading and book area, a toy library, a café, and guided and self-directed experiences. Instead of separating each activity into its own programme, PlayStudio lets people move between modes of engagement.

THE PLAYISSM DIFFERENCE

More than a play café, activity centre or tuition space. Its value is the ecosystem: a considered physical environment where different forms of play, learning, creativity and connection coexist.

LONG-TERM DIRECTION

A flagship physical model that becomes a repeatable expression of PLAYISSM, combining experience, community, programming and space into a destination for families and learners.

WHO IT'S FOR

Children and families · Communities · Schools and educators · Creators and partners · Organisations seeking meaningful physical experiences
