Kagami 鏡

A global studio school for rhythm-led, regulation-first learning.

WHAT IT IS

Kagami is PLAYISSM's learning ecosystem, built on the idea that meaningful learning depends not only on what is taught, but on the conditions in which a learner can engage, explore and make meaning.

WHAT IT DOES

Studio-style learning, interdisciplinary exploration, projects, guided experiences and self-directed discovery. Rhythm-led and regulation-first, it leaves room for curiosity, agency, reflection and connection instead of a fixed sequence of instruction.

THE PLAYISSM DIFFERENCE

Not a conventional online school or a digital content library. Kagami is an approach built around experience, rhythm, agency and the learner's relationship with the world, with the PLAYISSM methodology as its framework.

LONG-TERM DIRECTION

A global learning ecosystem that shows how education can become more experiential, flexible, human-centred and responsive to the rhythms of learners.

WHO IT'S FOR

Children and families · Learners outside traditional schooling · Educators · Schools and learning communities · Collaborators shaping new approaches to learning
